# FOOTBALL'S GREATEST LINE-UP EVER

Get ready to tackle Madden's finest season yet. John Madden Football™ '93. The all-new version of the game with the greatest run anywhere. The top of the charts since day one.

This year, Madden really makes history. Twenty-eight updated pro teams. The eight greatest teams of all time—

Miami '72, Oakland '76, Dallas '77, Pittsburgh '78, Washington '82, San Francisco '84, Chicago '85, New York '86.

Plus the '92 All-Madden team and his Greatest Ever squad.

So you can pit the Hogs against the Steel Curtain. And see who lands on top. In all, thirty-eight different teams. Think you can find a more hard-hitting game? Take a hike.

Now available on Super NES.™

## 8 GREATEST TEAMS

MIAMI '72  
OAKLAND '76  
DALLAS '77  
PITTSBURGH '78  
WASHINGTON '82  
SAN FRANCISCO '84  
CHICAGO '85  
NEW YORK '86  
Here are my picks.

JOHN MADDEN  
ELECTRONIC ARTS SPORTS NEW

Talk about a game with Madden written all over it. Madden '93 has yards of plays. A total of 125 including new audibles. Each from the pen of John Madden. Including the no-huddle offense and a quarter-back kills the clock play.

It's a game of match-ups—Madden's brand of football. Each team scouted by the man himself. Battery back-up saves game and player stats through the playoffs. Make the right match-up at every position and you'll go all the way.

The action's never been more explosive. Shoestring catches. Clothesline tackles. Head butts. Defensive shifts. Safety blitzes. Taunts.

The more intense the action, the more excited Madden gets. Blasting out comments like "Boom!

Madden's playbook has some big surprises. Get caught in the wrong formation and you'll get burned.

Where'd that truck come from?" It's the true personality of football.

Call the no-huddle offense and you'll give an out-of-position defense the slip. Especially if it's a snowy day in Buffalo.

With head butts and shoestring catches, this game definitely has all the right moves.

A split play-calling screen keeps the other side of the line on its toes. Tougher computer opponents keep you on yours.

EASN™, the Electronic Arts Sports Network, is all over the field like a roving linebacker. Highlights. IsoVision™ instant replay. Cameras covering every angle of the game.

Make the right call. Phone (800) 245-4525 anytime. Or visit your local EA dealer. And get the only game worthy of the Hall of Fame.

Welcome to issue #2! We are pleased to announce that Game Fan has been picked up for national distribution after just one issue! You'll now find us in between the other mag's throughout the U.S. (we'll be the one with the brilliant cover). Inside you'll find all the improvements you asked for in your cards and letters, like bigger screen shots, easier readability, and more of Other Stuff, Game Fan's incredible industry section (check out Chun Li this month... *grrrrr!*). We're also hard at work answering your questions, the Postmeister will be ready to go in issue #3. Please continue to write in with your questions and suggestions. You have a lot to say and we're here to make sure your message gets out. Ok, enough about us... it's time to talk about you and what you'll be playing in the near (and not so near) future.

Hitting stores now is the surprising Sega CD which is proving to be better than anyone ever dreamed as the first round of games are loaded with tricks like arcade quality hardware scaling and movie quality full motion video. But alas, do you think the boys at Nintendo will stand idly by while Sega grabs the checkered flag?... Oh no. In a recent press release they announced that together with Sony, Nintendo will be launching their CD ROM which will utilize the advanced CD ROM XA format and until then, we'll be enjoying the new FX chip which speeds up the SNES considerably and allows sprites to scale independently. And then there is EA, Atari, TTI, and SNK who all have plans of their own for '93. *Yikes!* We might be working overtime to afford it but we're looking at some serious hardware. My only hope is that it stops here so we can make our choices and settle in with one format for a while. By the time programmers learn one system someone throws a new book at 'em. Oh well, stay tuned, we'll be bringing you the latest blow by blow each month in Game Fan. *We're on it!*

Skid and Brody are Game Fan's 2 resident game hogs. They play all day, then they fight it out in viewpoint

## SKIDS BIG THRILL OF THE MONTH

This month my pick as the game most likely to make you fake sick is *Sunset Riders*. Since Sonic is a given this month, I'll take *Sunset Riders*. I think I played it about a zillion times. Everyone thinks I'm crazy, but that's the way I call it. Keep in mind I like Unique games and seldom follow the pack.

## BRODY'S REALLY NEAT GAME DECISION

I had a really tough time trying to decide what my favorite game of the month was. *Sonic 2* was my first choice but I couldn't stop thinking about how much fun I had with *Cybernator*. Since bonehead over there went with Sega, I'll stick with the SNES and I'll take *Cybernator* as my choice for game of the month.

**CYBERNATOR - KONAMI**  
ACT/STR. 8 MEG AVAIL. NOW  
REVIEW PG. 32 BY E. STORM

I like the idea of donning a huge mech. suit and squashing the enemy! *Cybernator* is a thrill a minute action shooting excursion for ninja gamers only (like myself). This is definitely one of the best games for the big SNES. Konami's just too good, maybe they'll let me move in.

Konami has maxed out the SNES this time with *Cybernator*! Coming close to perfection from the graphics to the music, nothing was over looked. It's like playing a movie with a full musical sound track and an intense story line that keeps you on the edge of your seat! Possible candidate for game of the year.

**SUPER VALIS IV - ATLUS**  
ACT 8 MEG AVAIL. NOW  
REVIEW PG. 48 BY K. FAUSTO

At first I thought this one may be pretty good. The graphics are great and the soundtrack is one of the best I've heard, but after a few levels I found myself falling asleep at the controller. There's just not enough here. High frustration and missing moves killed the game. Better than a poke in the eye.

If you haven't played a *Valis* game you aren't a gamer as she has made her way to just about every system. Here's the things I liked about this game: Good graphics & scrolls plus cool music. My dislike, however, was the difficulty level and playability. Having to repeat the same level over and over is a drag. Next!

**SPACE MEGAFORCE - TOHO**  
STR. 8 MEG AVAIL. NOW  
REVIEW PG. 36 BY BUD D.

You'll get a big yawn from me when you even mention an overhead shooter, as I could fill my tub with the ones I don't like, but this one is quite the dazzling shooter, leaving a huge challenge behind for those who dare to compare. Best overhead for the SNES.

Space Megaforce is a shooter addicts dream come true! This is truly one of the best shooters on the SNES, sporting mind blowing graphics and a rockin' sound track. Throw in loads of mode 7, great playability with no slow down or flicker and you've got a winner ... So why are you still reading this review? Go buy it!

**X Zone - KEMCO**  
SPR SCPE 4 MEG AVAIL. NOW  
REVIEW PG. 48 BY D. HUNTER

Stand in front of your TV with a bazooka and you're either a raving loon or you just got *X-zone*. This second game for the Super Scope is much better than the pack-ins, mainly due to the two viewpoints and you don't get a headache looking through the scope... just blast away... good stuff.

Finally, another Super Scope game! *X-zone* was worth the wait. You can hold your scope Terminator style as this game has a cursor on screen at all times. Hurrah! No longer will you have to try to get back in focus after playing for a while, plus we're talking great graphics. Mindless but fun!

**DRAGON'S LAIR - DATA EAST**  
ACT 8 MEG AVAIL. NOW  
REVIEW PG. 37 BY BUD D.

The graphics, color, and sound in this game are killer, and the game is laid out well, and quite the challenge. My only beef is that Dirk tends to overstep a bit, making pinpoint jumps a real pain. Once you get the control down, I think you'll find this a worthy adventure.

Since I can't have the arcade version on a home system (yet), this one will definitely do. The graphics are big and colorful plus great music and sound effects to boot. The only thing is, it might take a little while to get used to the control. Regardless, *Dragon's Lair* is worth the price of admission.

**SONIC BLASTMAN - TAITO**  
ACT 8 MEG AVAIL. NOW JAPAN  
REVIEW PG. 46 BY E. STORM

*Sonic Blastman* is the best superhero game I've played in a long time combining superhuman moves in a Final Fight action style format. I'm not normally a fan of the boring kick & punch style games but I found this one held my interest, but to the killer moves and some awesome special effects. Taito finally hits the mark.

*Sonic Blastman* is a pure side scrolling punch & kick beat 'em up in the Final Fight tradition. This game works well as Mr. Blastman has an assortment of comical but effective moves. Great backgrounds and plenty of brainless action. Check it out.

**EQUINOX - SONY IMAGESOFT**  
ACT/ADV 8 MEG AVAIL. DEC.  
REVIEW PG. 38 BY BUD D.

Got about a week? Maybe a vacation coming up? Plan on parking it for a while with this no-sleeper from Sony. Amazing sound and graphics keep you going on this one, as you'll pull out your hair and toss controllers all night. Whether you're into action, RPG's, or whatever, *Equinox* is a true test, excellent!

Sony has become an unstoppable force with plenty of quality softs, and *Equinox* is #1 on that list. Talk about a long and involving quest! We're talking weeks! This game sports graphics and sound like you've never experienced before, plan on calling in sick!

**SUNSET RIDERS - KONAMI**  
ACT 8 MEG AVAIL. DEC  
REVIEW PG. 12 BY E. STORM

Would you expect anything other than a shining score for a Konami game? *Sunset Riders* (besides being an absolute blast) is put together incredibly well with solid addicting game play from start to finish. It's a little short but it's unique and fun to play over and over, and it comes complete with some great cowboy tunes... Sends you straight into the wild west... without the dust.

Here it is - one of Konami's first intro's to the Sega Genesis. This is what we've all been waiting for! I'll tell you it was worth it! Konami means quality and *Sunset Riders* is no exception. Even more playable than the arcade with excellent music and graphics plus two player simultaneous shoot 'em dead action. What's next? I need more!

**CHUCK ROCK - SONY IMAGESOFT**  
ACT 8 MEG AVAIL. NOW  
REVIEW PG. 42 BY E. STORM

This new version of the scroungy cave dweller we've all come to know and love is excellent, with new backdrops and big SNES sound. Maybe Chuck's not the best role model (being a fat pig and all), but he sure makes for a fun evening. "Unga Bunga"

Chuck Rock the crusty cave man has belly-butt himself onto the SNES in a new improved version of this popular Virgin title. New music and scrolling backgrounds are some of the things you'll notice, plus all the fiendish traps and puzzles just waiting to make our hairy hero extinct. Chuck Rocks!

**T.M.N.T. HYPERSTONE HEIST - KONAMI**  
ACT 8 MEG AVAIL. DEC.  
REVIEW PG. 13 BY E. STORM

Turtles on the Genesis is a beat 'em up blast-a-minute with scorching turtle tunes, hordes of kooks 'a bash, and some of the best character animation you'll ever see. Forget about pumpin' in those silver slugs Konami brings the arcade thrill home... I want more!

It was only a matter of time till those green good guys made their way to Sega and even the most die-hard turtle freaks will be completely satisfied when they play *T.M.N.T. Hyperstone Heist*. With graphics and music rivaling the SNES version plus totally new levels and some of the most hilarious 2 player beat 'em up action ever seen will make this game a classic for years to come.

**SONIC 2 - SEGA**  
**ACT 8 MEG AVAIL. NOV 24th**  
**REVIEW PG. 14 BY E. STORM**

I've been drooling for this one ever since part 1 and Sega came through! Sonic 2 is amazing, faster and nastier than ever spinning through awesome new zones that will make your eyes bug out! Running so fast I thought my monitor would explode. The creativity and attention to detail is remarkable and to finish with all the chaos emeralds is a worthy challenge for even the best players. I won't even mention the BIG surprise... you'll see.

The little blue dude with an attitude is back and I knew he wouldn't let me down. With longer levels, new options, incredible detail, and a new friend. Sonic 2 just has so much to offer. Definitely the best thing since the last best thing. Now CD me!

**ROAD RASH II - EA**  
**ACT 8 MEG AVAIL. DEC.**  
**REVIEW PG. 18 BY TALKO**

Playing part one I remember saying "I wish it was 2 players", and now it is... But that's not all. While preserving the original format EA has managed to improve every category with more of the same except better! Definitely an awesome sequel and one of the funnest and most addicting games you'll ever play... Alone or with a friend.

As major Rash fan I had high expectations of what RRII would have to offer over the first. I am happy to say EA came through! All the head bashing rubber burning action of the original is here with many added improvements including a 2 player split screen option. This game is a must have! So grab a controller and catch some air!

**WWF WRESTLEMANIA - FLYING EDGE**  
**ACT 8 MEG AVAIL. NOW**  
**REVIEW PG. 20 BY BUD D.**

I'm not a big fan of this sweaty past time, in fact I've never liked a wrestling game but I thought this one was pretty cool tossing Brody onto the ground and stomping on his head was quite invigorating! Good control and lots of moves and play options make this a Hulkamaniacs dream come true...

Ok I'll admit it, sports games aren't my specialty (we leave that to Talko) but I do get a kick out of being able to give an elbow sandwich to any un worthy opponents when given the chance, and that's what WWF's about. This game cart has some fun gameplay and cool graphics that should keep any wanna Obe wrestlers busy for a while! It's too bad about Skid though, broken any controllers lately?

**STEEL TALONS - TENGEN**  
**SIM. 8 MEG AVAIL. NOW**  
**REVIEW PG. 22 BY E. STORM**

The first polygon game on the Genesis that doesn't make me want to throw my controller! Talons mixes simulation and shooting very well and gives you 3 play choices and 2 viewpoints creating a lasting challenge and an impressive overall package... The best in it's class.

Talons is a great translation straight from the arcade and this helicopter simulation is top notch. Tengen makes impressive use of polygon graphics and there is enough mix of action and strategy to keep even the best gamers playing for hours on end. Steel talons has cool features such as different perspectives and 2 player co-op plus tons of digitized speech. This game is definitely above the competition.

**ALI BOXING- VIRGIN**  
**SPT. 8 MEG AVAIL. NOW**  
**REVIEW PG. 21 BY E. STORM**

Ali boxing is in a class by it's self in the boxing field. The first thing I noticed was the great control and the ability to rotate the ring adding new dimension to this type of game. I also like watching my opponent swell as I pummel him into the ropes, the graphics and sounds are also done incredibly well... Another great game from Virgin!

Ali is boxing done right. This game has everything would be contenders could ask for: bone crushing sound effects, spurts of blood, and ring rotation plus a bodacious babe between rounds. The guys at Virgin must know something the other's don't.

**TIME GAL - WOLFTEAM**  
**LD CD AVAILABLE NOW JAPAN**  
**REVIEW PG. 24 BY MORREY**

LD games never really interested me, pumping in your life's savings to memorize a game. But now that you can play at home it's a whole new experience. Even though the theme is a bit looney I had allot of fun playing Time Gal (Heck, I'd buy it just to watch the animation) but it could have used a little more interaction. There's always road blaster.

Contrary to ol' Skidster, I've always craved these types of games! Who else could claim to beat Dragon's Lair on one quarter? Well if your like me then you'll want to check out Time Gal. Non stop animation and stereo sound put together on another Wolfteam masterpiece... Keep 'em coming!!

**CHIKI CHIKI BOYS - SEGA**  
**ACT 8 MEG AVAIL. NOW JAPAN**  
**REVIEW PG. 26 BY E. STORM**

Here's a nice little arcade translation from the boyz at Sega. The overall quality and fun is faithfully duplicated making this a must-o-la for action platform gamers. The only thing missing is a 2 player feature, other than that it's a totally awesome game. I'll take as many of these as they'll give me..

This little known Capcom coin-op has been reprogrammed by the masters at Sega of Japan and has turned out excellent. I like these platform action style games and Chiki Chiki Boys really delivers! at first glance it may look allot like Wonder Boy but don't be fooled. This is pure jump and slash action at its finest. Pick up the import if you can't wait.

**FORGOTTEN WORLDS - TTI**  
**SHOOTER SCD AVAIL. NOV**  
**REVIEW PG. 56 BY K. FAUSTO**

This one should be called Forgotten Graphics, what happened? This is a Super CD and Air Zonk blows it out of the galaxy! NO SCROLLS! What gives? This once mighty Capcom 2 player shooter now sports major flicky, frequent access delays and only one player. Oh well, it does have good music... And hey, it's still Forgotten Worlds.

If you're not going to do this game justice than don't bring it out! Not that Forgotten Worlds is an entirely bad game it's just that I expected soooo much more! Where is the scrolls? Here's the flicker! Is this really a Super CD? Well at least the music's good.

**SHADOW OF THE BEAST - TTI**  
**ACT SCD AVAIL. NOW JAPAN**  
**REVIEW PG. 57 BY BUD D.**

Shadow of the Beast gets two much needed improvements on Super CD that were absent on the Genesis. The addition of an option screen to set up your game and one of the best soundtracks you'll ever hear. My only complaint is the lack of a scroll in the underground level, other than that I would say this is the best version so far and a solid title for a new system.

All you Amiga maniacs and Genesis owners out there will appreciate this version of Shadow of the Beast for the plain fact that it has continues! Yes finally we get to see some other levels without using a cheat or Action Replay. Plus, the Duo version has some of the best music ever heard on this system. Beast is a solid action game with some amazing scrolling and is definitely the best version so far.

**SOLDIER BLADE - HUDSON**  
**ACT 4 MEG AVAIL. NOW**  
**REVIEW PG. 55 BY D. HUNTER**

Since we rate games in comparison to others on that system I would have to say that Soldier Blade is a great shooter. It's nice to see quality games returning to the TG 16. I've always had a soft spot for it. Soldier Blade throws a lot at you with great use of color and some nice scrolls (and the last level's a real surprise). A must for TG 16 owners.

Soldier Blade is a direct descendant from the ever popular Super Star Soldier and has all the over head shooting you can stand packed in a 4meg cart. The graphics are great, with huge bosses, lots of color, and of course scrolls. With Killer weapons at your disposal this one will make you CrAZy.

**AIR ZONK - HUDSON**  
**SHOOTER 4 MEG AVAIL. NOW**  
**REVIEW PG. 59 BY E. STORM**

This futuristic little big headed buzzrod of a bonk makes for one of the best side scroll shooters on any system. In it's class this game is totally unique in every way, I hope these programmers are doing Bonk III. I'd buy a Turbo for this game alone!

What a cool game! Zonk is an amazing shooter for your Turbo with some of the most hilarious power-ups and graphics to date. Where else can you transform into dogle-Zonk and pelt the enemy with your barks!? Don't pass up this HuCard as it is destined to become a classic in record time.

**POWER DRIFT - ASMUK**  
**ACT 4 MEG AVAIL. NOW JAPAN**  
**REVIEW PG. 60 BY K. FAUSTO**

Though not even close to the arcade rush, this version is stupendous for a 4 meg game. With great cartoony graphics, good sound effects, and addicting gameplay. If you have a TG 16 or PC Engine go find one!

A PC Engine classic that still holds up well today. Powerdrift is a close translation of the arcade original considering the PC Engine can't do any fancy hardware scaling or rotation. This game offers clear digitized voice and provides a tough challenge making this game a must have!

**SOCCER BRAWL - SNK**  
**ACT 46 MEG AVAIL. NOW**  
**REVIEW PG. 63 BY BIG J.**

Here's what I like about the guys at Alpha, when they make a sports game they manage to break the mold every time First with 20/20 now with Soccer Brawl. If you pass this one up because it's soccer, think again... This is more like war! Who cares what the score is you'll be too busy blasting and laughing... Lasting power, a must for Neo Geo owners.

Most older Neo Geo games are known for their incredible graphics and sound but short game play life due to unlimited continues or usage of the memory card. Well, Soccer Brawl is the exception. Besides having great graphics and sound you get total playability. The more you play, the more addicting gets! Soccer Brawl is a great competition game and should have its own spot on every Neo Geo owners shelf.

**VIEWPOINT - AMERICAN SAMMY**  
**ACT 75 MEG AVAIL. NOW**  
**REVIEW PG. 62 BY BLINKY**

WOW! This game looks to good even for the Neo Geo. By far the best game on the system so far. Gone is the pesty 2 player mode (I don't have to share this one with some clutz who gets in my way). Say hello to polygon gaming at it's best. Geo owners, prepare to be amazed!... Shooter of the year.

With more titles like this there would be a Neo Geo connected to every gamer's T.V. Everything about Viewpoint is mind blowing! The graphics are like nothing you've ever seen, at home or in the arcades and are all done in shaded polygons. The music is also worth mentioning with its full techno pop beat. Viewpoint is reason enough to go out and purchase a Neo Geo right now!

**SOL FEACE 1991**

**W**olf Team is currently regarded as one of the top software developers in Japan. They have shown an overwhelming interest (unlike other 3rd party companies) in developing Mega CD games.

Wolfteam's games are some of the most popular among Mega Drive titles as each game shows new creativity and innovation. After visiting Wolfteam we can see why. They are a young and energetic company, as excited about they're next game as we are. We spoke with Mr. Masahiro Akishino and here's what he had to say...

**Mr Masahiro Akishino**  
Managing Director

DHNN: How many programmers do you have?

WT: 20 programmers are on duty 24 hours a day to make fun games.

DHNN: Could you tell me what made you decide to go into laserdisc titles and which ones are coming?

WT: Since the Mega CD was released as a superior system we thought someone should make games that only the Mega CD could handle. Our future releases include: Time Gal and Road Blasters so far.

DHNN: How long does it take to transfer a LD game to CD?

WT: It varies, but about 3 months.

DHNN: Why can't you pause LD games?

WT: There is a way but it makes the game too easy, that's why we didn't add this feature.

DHNN: Will great games like Arcus Odyssey, El Viento, or Ernest Evans ever get sequels?

WT: We have just announced Annette again (sequel to El Viento) on Mega CD for a Jan. release. If there's enough time and employees we'll do anything.

DHNN: How did you create the

movements on Ernest Evans?

WT: The fact is... we bought a GI Joe doll and studied it's movements (ha ha ha).

DHNN: It seems like Sega is approaching #1 in the U.S. do you see this happening in Japan?

WT: Actually it seems like they're not trying to be #1 in Japan but rather striving to

make fun and remarkable games (instead of following the pack).

DHNN: Do you have plans to support the Super Famicom CD ROM?

WT: Yes we do have plans to make games for the SFCD, but they will have to remain secret for now.

DHNN: How many Games do you have in development?

WT: 12 to 13, five for Mega CD. We have seven development systems.

DHNN: So that means you can release an average of 5 games a year, right?

WT: If we plan to release 5 we usually end up with 7 or 8.

DHNN: Do you consider the American market when you develop a product?

WT: We do have an interest in the U.S. market. We are in constant contact with Renovation and our point of view is always the world wide market.

DHNN: Is there anything you would like to say to American gamers?

WT: We will be making fun and joyfull things so keep cheering us up!

We really enjoyed our visit with Wolfteam, they are great people. We would like to say thank you to: Yoko, Yumi, Tomoko, and Emiko... Hi girls! keep up the great work!

**H**ere's the exciting news Sega players everywhere have been waiting for, Sunset Riders and T.M.N.T. The Hyperstone Heist! Cowabunga, Yee-Ha! Just like we all knew they would, Konami's already got the Genesis fully dialed in.

The first thing I noticed when I started playing Sunset Riders was that this was the first time I've played a western shoot 'em up on 16 bit. I'd say it was long over due. Sunset Riders is totally addicting, especially with two players. I found it much more fun as a home game than in the arcade. The graphics are great for a Genesis game with lots of scrolls, big explosions, and colorful backgrounds. There's also some great voice and horse ridin' bonus rounds where you can collect 1-ups and gold. But where Sunset Riders really excels is in pure fun, laughs, and lasting power ... and it ain't that easy either. Nowudahmean? So strap on yer peace maker and git yerself Sunset Riders!

T.M.N.T. is a big surprise! The graphics are first rate with excellent shading, animation, and attention to detail, and the music is awesome, rivaling the SNES all the way! As far as comparisons go, that's a tough one since both games each have their own special qualities. In this version you'll find tons of scrolls and fluid animation along with cool new levels like the surfboard, sewer, and pirate ship to name a few, all with no flicker or slow down, even with two players. Another nice feature is the dash button allowing you to run at will. While running you can perform flips, power slides, and sliding kicks. The control is perfect and can be customized in the option mode. Everything about Turtles is pure Konami. You won't believe you're playing a Genesis game. All we can do now is start praying for a Sega CD title, but until then I'll be kicking shell and dodgin' bullets.

can remember back when Sonic 1 came out, thinking how could it get any better than this? I thought that at best Sega would match that Sonic magic. When our test copy arrived everyone gathered around the monitor at my station to see if they had done it (made a better Sonic). The moment I started playing they started yelling ... Wow! Did you see that! ... No way! ... Awesome! Let me check it out! ... No way baby, just leave me the keys when you go home. I played through the night 'til 5:00 the next morning. That's what I call a great game. The time just flew by.

Sonic 2 is by far my pick for action game of the year. First of all Sonic is bigger, his legs are longer, and his head is rounder. He also has some great new animations and a smoking Super-Sonic roll! Part two is also longer, not necessarily in length, but in depth. Each level has so many places to explore, and there's hidden stuff everywhere. Another awesome addition is the new bonus rounds. Collect 50 rings on any level, find one of the many checkpoints, cross over and jump into the circle of stars, and voila! Scaling 1st person! It's like Sonic meets Stun Runner. Collect enough rings and you get the Chaos Emerald. Collect all the Emeralds and ... ??? All the new levels in Sonic 2 are equally impressive with loads of colors, incredible music, and different themes, but if you're looking for speed, look no further than

the Chemical Plant zone. Sonic runs so fast he pushes the screen! and speeds through suction tubes to unknown places.

In the Metropolis zone, Sonic runs through huge spinning wire barrels making full rotations while running, and tackles huge machinery, but wait 'til you

SCORE 7200  
TIME 1:35

jump on a huge nut and move up or down by running ... genius!

The Hill Top zone is loaded with surprises, including sliding platforms, places high in the sky and hidden undergrounds with lava pits and earthquakes, and wait 'til you see Oil Ocean! The colors here are brilliant and the levels are

CAN YOU FIND IT?

GET ALL THE CHAOS EMERALDS AND 50 RINGS, AND SOMETHING THAT YOU WILL NOT BELIEVE WILL HAPPEN

huge with tons of secrets within. You may find yourself blown into the air by the pressure or rotating airborne over fans or being sucked into cannons and hurled through the air!

If all this sounds too good to be true, wait until you hit Las Vegas. Remember the bumpers in part 1? ... There's hundreds of 'em! Or go for the slots by flipping Sonic into huge slot machines! Vegas is also a great place for 1ups and stocking up on rings.

Aquatic Ruin is another interesting place. First of all the music here is great and the level is half underwater! Stay in this level (part 2) a full ten minutes exploring from top to bottom, but don't rush! Stop for air or find a way to the surface.

In the Sky Fortress you'll climb all over a huge aircraft on your way to the toughest boss in the game and then it's onto the Death Egg zone.

As far as Miles goes, sometimes it's kinda nice to have him around, but he can be a pain by hogging rings or breaking your rhythm.

In the version we reviewed you couldn't shake him. I hope you can choose to leave him behind in the final version. Another weird twist is the two player mode. You can play up to four levels split (or squashed) screen with a friend. It's more of a race really, but its definitely a unique feature.

Sonic 2 is everything they said and more. It makes you wonder why more games aren't this good. Who knows, '93 may be the year with the Sega CD on the way and Sonic CD in March. I'll tell you one thing, my faith in Sega is totally restored. All this was done right here! Bravo! ... Oh ya, by the way ... has anyone seen the Hidden Palace?

Grab your club and your skid lid out of the closet! Welcome back to Road Rash ... II. It's time to hit the road once again fighting for cash, a better bike, (and even your life!) while avoiding an even nastier assortment of rashers, cops, and Sunday drivers. Here's what you'll find when you take control. Right from the start the enemies are meaner and faster, dogging you relentlessly as you fight for the lead. Only this time once you get there you no longer pull away and coast, 2nd and 3rd place chase you relentlessly, while doing their best to separate you from your ride, all the way to the finish (which now zooms out and shows a cool cartoon). RR II now scales even faster and smoother than before, with even more roadside attractions like mooing cows and huge rocks, add to that awesome landscapes and hills galore and you've got the ultimate racing game... right?...

Wrong, because EA didn't stop there. They've added an optional split screen mode and a one on one fight to the finish, making RR II far and away the best racing game for the Genesis ... Oh ya, just in case you were wondering, no one is safe from your club this time!

After three years of waiting, wrestling fans finally get a good wrestling game for the Genesis, with the release of WWF WrestleMania. Acclaim has added some features that any SNES owner would appreciate, with the addition of six new wrestlers and the ability to earn the title of WWF Champion of the World. There are a total of eight wrestlers, all with their own signature moves, Hulk with his leg drop, IRS's write off, Randy Savage's flying elbow drop, The Ultimate Warrior's gorilla slam, Shawn Michael's side suplex, Papa Shango's shoulder breaker, Ted Dibiase's million dollar dream, and the British Bulldog's powerslam, along with all the other usual drop kicks, body slams, head butts, and clotheslines. You'll also find one-on-one and tag-team options and the survivor series as well, making this a totally complete wrestling game. All this sounds great, but how does it control? WWF makes full use of the Genesis control pad and

is easy to learn. The character graphics are also done really well. All the characters look digitized and animate fluidly making this the ultimate Genesis wrestling game!

Normally, I'm not one to favor boxing games. As of yet none have really thrilled me in either control or graphics ... until now! Even if you've never bought a boxing game before, get this one!

This 8 meg cart is 3rd generation all the way. The intro alone is worth the price of admission, with Ali himself in digitized full motion, shouting

"Who's the heavyweight champion of the world!", and the crowd joining in "Ali! Ali!", complete with great voice from the ring announcer, scaling logos and a zoom in on the polygon landscape. As far as the action goes, the control over the fighters is perfect, fully utilizing the control pad. During the fight you can rotate the ring for different viewpoints and

each punch lands with a different sampled crunch. As faces swell and eyes close, and between rounds as you view your puffy noggin and take a rest, you can feast your eyes on the blonde round card babe (shwing!). There are 9 boxers to choose from or you can be Ali himself, so go for the belt or take on a friend. Ali is hands down the #1 boxing game so far on any system.

To this point the Genesis hasn't been able to successfully hold my interest with the polygon simulation style games as they usually end up choppy or hard to control. I am happy to say that Steel Talons by Tengen doesn't suffer from either. Talons controls extremely well as you can easily drop down into

canyons to take out a target, survey the area, hover upward locking on to easy ground targets, or chasing other aircraft. In fact, you can actually hover right at ground level and follow a vehicle down the road before you blast him. Another nice option is the two viewpoints as you can look on from inside the cockpit or behind your chopper. You can select from 3 missions: Combat, where you clear infested areas, Head to Head, where you'll engage other fighters, or Training to sharpen your skills. There is a time limit on each mission. If you go over the time you can still finish, but to see the real ending you must pass all 12 successfully. The gameplay in Talons takes a while to master. You won't beat it your first time, but once you get it wired it becomes addicting, fun, and challenging to come in under the allotted time. There's also some cool voices and

Here's a great Capcom arcade game that skipped right by as it only saw the light of day in Japan's arcades back in 1990. Chiki Chiki Boys fits perfectly well into a category that is lacking on both the Genesis and the Mega Drive, that being the action platform format.

As infants the two brothers somehow survived the overthrow of their village by evil forces. Now as teenagers they return, bent on revenge, to free their leaders and reclaim the land.

Everything about Chiki Chiki Boys is first rate. The graphics, color, control and music are excellent. True to the arcade, the action consists of flying, swimming, and side scroll action scenarios. Throughout the game as you defeat enemies you earn coins which, at the end of each round, you'll use to buy

weapon upgrades, health, magic spells, and continues. During the action you can cling to walls for safety, fight with your sword, and use magic to complete each round. Each level consists of three parts and finally a boss. When you defeat each guardian you will receive a key and open the door to the next challenge (similar to Ghouls & Ghosts). All this adds up to another great trademark Capcom action game, so if you're looking for some arcade style fun, Chiki Chiki boys comes highly recommended.!!

You know, you wake up all crusty, drag your blanket into the living room, close the blinds, and just lock in. Cybernator takes you right into a movie-like atmosphere with a great storyline and the gameplay is totally unique.

Even though the character on the screen is small, in reality it is a huge cybersuit and somehow the programmers make it feel huge and heavy without losing

anything in the control. The attention to detail is stunning, with color and shading setting the mood just right. Your character jumps and powerslides along with an assortment of weapons you can obtain then level up. Leveling up your weapons in fact is the key to victory. Space Megaforce is the latest in the growing line up of shooters for the SNES. Although it does combine certain aspects found in other shooters, Space Megaforce is in a class all its own. Designed to tax the SNES to its limits, every level has some sort of graphic special effect. In one level you'll find the boss stretches and ripples like liquid, and in another, you find yourself fighting against a rotating space station which is constantly scaling in and out of the background. What also makes this game stand out is the sheer number of weapons

available for your ship. You can choose from eight different items ranging from homers to lasers, and each weapon can be leveled up to six times. You can also adjust the formation of your weapons to protect yourself from all sides.

This game really shines in all aspects, the levels are long and get increasingly difficult, and every boss uses the full extent of the SNES mode 7 capabilities. All this plus a great sound track make Space Megaforce one of the top five shooters available for the SNES, I highly recommend it.

In this version which is loosely based on its laser disk counterpart, you control Dirk the Daring the somewhat clumsy but valiant knight on the quest to rescue the beautiful princess Daphne who's been kidnapped by the evil dragon Singue.

Being a big fan of the coin op, I've been eagerly awaiting a home version that I could really get into and I am most pleased to say that Date East didn't let me down. In this new action version you control the noble Dirk as he runs, jumps, ducks, throws weapons, and wields a sword, and every time you come in contact with an enemy you will let out a frightful scream. The sound effects in this game are very well done. Each character has its own special shriek as you hack them into eternity. The graphics in Dragon's Lair are primo with dazzling colors and effects such as misty fog and splashes of thunder and lighting. Each level is littered with special items which Dirk must break open and collect. You can advance to the next level by finding the exit or you can stick around and collect items to enter the bonus round. At first you may find the control a little difficult, but once you get Dirk dialed in it becomes second nature. Overall Dragon's Lair is an exceptional action platform game you shouldn't pass up.

**J**ust one year ago, you'd have never dreamed of controlling a carbon copy of everyone's favorite Looney Tune complete with sight gags and sound effects right out of the cartoon. Well now you can if you pick up a copy of Death Valley Rally, Sunsoft's new action cartoon game for the SNES where you control that famous rocket bird, the Road Runner. Meep Meep! Judging by what we saw while visiting Sunsoft, this game looks great, but since we didn't get the chance to really sink our mits into it, we really can't write a review. What we can say is that the graphics and sound effects are first rate, and Sunsoft is known for its high quality games. Look for a full review in a future issue.

**I**n Sunsoft's new shooter Firepower 2000, you and a comrade can each assume separate roles. One driving a jeep (beep beep) and the other piloting an attack chopper, creating a new experience in shooting action. The graphics are some of the best we've seen on the SNES with no slow down or flick anywhere, even when the largest adversary lurks in your path. The jeep seems to be the vehicle of choice as you'll pass under bridges, jump pools of scorching lava, and even zip across water! Firepower 2000 shows that done correctly shooters can still offer fun and challenge to even the most experienced gamers. Look for a full review in our next issue.

*Axelay could be the hottest shooter ever made!*

Electronic Gaming Monthly

They said it all! Other shooter games may claim they're the best. But Axelay reveals its true colors on the high speed, Super NES™ ride of your life through untold eons of spectrum shattering special 3-D effects.

Gauge enemy fire power and attack patterns or you'll be cosmic dust.

Scream through the stratosphere horizontally or tear up the extraterrestrials in head-on vertical style. You're flying the prototype tactical fighter ship, Axelay, with the most sophisticated weaponry ever invented, like the deadly Round Vulcan with its full 360° range.

In 6 shocking stages of horrific floating fortresses, multi-legged mobile forts, robot cities, volcanos and the City of Darkness you may be tempted to stop and see the sights. Not a good idea, even for a glance, unless you want an asteroid up your nose. Just see for yourself what the critics are raving about.

Axelay's arsenal is pumped and primed for confronting the huge intimidating honchos at the end of each stage.

the planet Sonic, sent to earth to fight evil doers! (In other words this is Japan's Superman!) What sets Sonic Blastman aside from all the other standard punch and kick games is an assortment of great

moves, some nice special FX's, and the unique characters throughout the game. The graphics are excellent as is the control. There is a little slow down but only when the screen is filled

with enemies. Otherwise SB is glitch free, and the music is reminiscent of Final Fight. Overall if you're a fighting game fan I would definitely recommend SB. It's a standout game in its field.

Super Valis starts out with some excellent graphics and a great soundtrack. We played through the first 2 levels thinking this seemed to be an all right game! However, from there on things seemed to go downhill. In an attempt to make things harder, the programmers threw in enemies that kill you in stupid ways. Even if you are a highly skilled player you will die repeatedly. That's the key word, repeat. You will have to play a level over and over to pass it, and the worst part is that if you die anywhere in the level, even at the boss, you have to go all the way back to the start of the level. Also missing are the trademark Valis slide and double jump. Buy it for the soundtrack.

Finally, another game for the Super Scope. Xzone is the first Super Scope game to make extensive use of mode 7. You start off in an overhead mode spiraling down closer and closer to an enemy base blasting oncoming missiles and unwanted airborne companions. You're then hurled into a side scrolling mode with endless hordes of hostile droids trying to end your precarious existence. After blasting your way through this section you're faced

with a monastically difficult set of bosses and thrust into a first-person 3D screamer that'll have you pausing to catch your breath. The game control is superior to previous SS titles due to the permanent on-screen curser, so you're not stuck looking through the ill-designed scope sparing you a visit to the chiroprator. Not having to calibrate the scope every time you plug in the game is another big plus. Xzone is the game Super Scope owners have been waiting for!

We've been watching the progress of this game for some time and it looks like it's going to be a big winner, incorporating Street Fighter 2 style gameplay with a

new cast of characters. Both character animation and backgrounds are looking good. Even though there's a lot of fighting games coming out, there's always room for more (if they're good). If you've never played Fatal Fury let me just tell you this one comes closer to Street Fighter 2 in fun and playability than any other so far. The Super NES version features player vs. player option and allows you to be the bosses. Judging from these screens, Takara has done a great job on the translation. If the animation and sound are even close to the Neo Geo, we've got a winner for sure. Look for a full review in next month's fighting special!

**P**art 3 in the series, Soldier Blade is another high quality 4 meg HuCard shooter, one of the few card games left to get this much attention since the focus has shifted to CD ROM development. This is due to the popularity of its predecessors in Japan, Super Star Soldier and Final Soldier. The graphics, music, and speed are slick and well presented as the screen is almost constantly loaded with multiple alien ships and big scrolling landscapes. For an 8 bitter this one really pumps, so if you're a fan of overhead shooters this one's worth the trip outdoors to your local video game dealer. You won't find many better in the Turbo lineup.

**F**orgotten Worlds by Capcom is one of the coolest 2 player shooters ever to grace an arcade screen, but for some reason home systems haven't been able to duplicate the arcade game successfully. The Genesis version came close but forgot 2 of the original levels. When I heard it was coming to Super CD I thought we'd finally get the real thing due to the extra RAM and vast memory.

However, what we've got here is missing even more, most importantly the 2 player feature is gone ... bummer! Another let-down is the lack of a scroll and the bothersome flicker. What's good about this version is the music (I would hope so, it's a CD), and all the levels are here, but c'mon guys, this is Super CD, look at Gate of Thunder. I guess if you've never played the Sega or arcade version you may think this is a decent shooter, but in my book it falls way short. I wouldn't let this discourage you though, we know the Duo is capable of great things.

PC and Genesis owners will be familiar with this already classic Psygnosis title which has made its way to CD ROM via the Turbo Duo.

In this action/adventure game you control a tormented beast whose humanity was stolen away by the evil Beast Lord. Battle your way through hordes of enemies using only your wit and skill to survive until the final confrontation where you'll fight to gain back your human form.

Shadow of the Beast is a game that's been done on many formats from the Amiga to the Lynx including a Super NES version coming soon. What this game has to offer over the others is better playability, control, and some of the best music ever! Also, you'll find that by pressing the select button at the title screen an options menu will appear that gives extra continues, a sound select, plus an option to boost your life meter. The only thing this game is missing is the parallax scrolling inside the underground levels.

All in all I recommend checking out Shadow of the Beast with its outstanding graphics, multi-layered scrolls, and atmospheric music.

Loaded with layers of scrolls, lots of colors, incredible cartoon enemies, and the best power ups a shooter ever had, Air Zonk flies into Teeez everywhere (if you've got a TG-16). If he flies in and you don't have a Turbo you better have a fly swatter. The only way you're going to get me out of bed to play a shooter is with some big extra features, and Air Zonk delivers just that. As if Bonk wasn't cool enough with his rock-bustin' melon, his distant relative is a cyborg who can morph with a crazy cast of whacked out space freaks that'll have you hit-

ting the pause button constantly. So how did all this happen? Set deep in the future the Evil King drool sets out to create the ultimate warrior to carry out his plans for global domination. He decides to use a relative of the mighty legend Bonk by turning him into an evil cyborg to be known as Zonk. However, once transformed, the good shines through Zonk, and now together with his friends, he is bent on revenge, vowing to destroy his evil creator and return peace to the galaxy once and for all. This story sets up the great ending you'll see when you complete all the levels and confront the minions of King drool himself. Air Zonk is a great shooter and the best Turbo game I've ever played. At the onset of each zone you'll choose from eight of your comrades

to assist you on that level. When you grab the first Zonk icon that friend will join you fighting by your side. Grab these second one and Zonk and his friend morph for an effect you won't believe (what a great idea this would be for a Zonk action game). There are eight friends to choose from including Spike Ree, Power Dump, Bubblician, Scud, "Bob", Ripp, Mumbles, Astra, Moo Moo, and Tojo, each transforming Zonk into a crazy

new creature with all new

weapons and power ups.

Air Zonk is also loaded with huge cartoony bosses and great music. Even the options screen is whacked out offering Sweet, Spicy, or Bitter mode. Air Zonk is the kind of game the Turbo needs to stay competitive. It's worth

buying the system just to own this game if you are a big shooter fan like I am. So if you're looking to blast into a great shooter with good lasting power, don't miss Air Zonk. I highly recommend it.

Have you ever just felt like popping off your head and throwing it? If you have, go see a doctor, or check out this month's Graveyard game DecapAttack starring Chuck D. Head. # JOHN MADDEN FOOTBALL '93

What a difference a year makes...8,760 little hours... Welcome to the complete resurrection of a football legend, John Madden Football, 1993.

As most of you know, The original John Madden Football for the SNES was one of last year's biggest disappointments. It seemed that the development team just could not come to grips with Mode 7 and the game was choppy and poorly executed. The game fared even worse when compared to its Genesis cousin.

It is now a new season and you can't keep a good coach down. John Madden, 1993 is an outstanding sports title with graphics and game play that really stretch the lim-

its of the SNES. You can jump, dive, hurdle and spin through a tilted first person scaling environment that allows you total control over play calling and execution of your game plan.

New features for this super sequel include the following; more extensive statistics with individual stats for your "skill" players, a hurry-up offense, all of the "pro" teams (represented by the team's city and player numbers) plus some great teams of the recent past, digitized, animated crowd close-ups, head butting on great defensive plays and excellent voice and sound effects.

**TALKO TIP:** When running, do not use the "oomph" button. The

"Hurdle" button does a much better job of dispatching defenders.

This game is an absolute joy to play. It has the best passing mechanism of any football game, with the exception of Tradewest's Pro Quarterback. In addition, Madden, 1993 has player control that is unmatched by any game on any platform. One of my few complaints, as with Pro Quarterback, is that you can not save a season and stats to battery, although, as in the original, you can play through the playoffs with a password save feature.

There is no doubt that this is the golden age of sports gaming on 16-bit systems. John Madden Football, 1993 for the SNES is one of the best examples of this. If you are able to find a copy of this super soft at your local retailer, snatch it up, the demand will be great and so is the game.

# JOHN MADDEN FOOTBALL™ '93

Madden speaks! In their third installment of the popular John Madden football series, the designers at EASN have tuned-up Madden '92 for a new season that includes many upgrades from last year's title, including a number of sound bites (bytes?). BOOM!...

The graphic presentation of this year's title is essentially the same as Madden '92 with some new digitized crowd animations and referee close-ups. Play calling is now accomplished via a split-screen system that allows you to see the playing field at the same time. In addition, EASN

has finally included fans in the end zone, although they look like they are trapped in a wall.

The inclusion of digitized samples of Madden's voice are also a welcome addition. There are about a dozen or so samples that are reasonably clear and add to the playability of the game, while providing some humor.

Other new features in Madden '93 include; defensive players giving each other head butts after a sack or a loss of yardage, a no-huddle offense that automatically selects the same play that you had last called, clothesline tackles, shoestring catches and the ability of the quarterback to intentionally "ground" the ball to stop the clock.

Now, the big news for all of you stats freaks out there is that Madden '93 has a battery. While you can not save an entire 16 game season, the game will allow you to save after any game during the playoffs and it saves statistics as well.

The statistical tracking is particularly well done. In addition to keeping track of team statistics, Madden '93 keeps individual stats on all of your receivers, running backs and quarterbacks. I know the question you are all asking now...O.K.,

so its got some improvements, I've got Madden '92, is it worth 60 bucks to buy the new game?

My answer to that question is a qualified yes. If you are looking for a new graphic environment in the game, you are not going to get that with Madden '93.

But, if you are looking for evolutionary and revolutionary game play in a game that is the #1 football simulation of all time, and a battery and Madden's voice to boot, you can't go wrong with Madden '93. The big man and the gang at EASN have produced another winner.

**TALKO TIP:** To aid in receiving a pass, push button 'C' just before the ball reaches the receiver. This will increase your chances of catching the pass.

# SPORTS TALK FOOTBALL™

STARRING *Joe Montana*

SPIN AND YOU'RE GONE

The third installment in the Montana series, as well as the third edition of Sega's Sportstalk series for the Genesis, has arrived for the '92 season and it is a giant step forward for sports entertainment software.

The first thing that you will notice about this title, in no small way due to the large, rotating logo in the beginning of the game, is that Montana 3 has an NFL license.

In addition to the NFL license, Montana 3 sports a new graphic look that has more options and better animation than you have ever seen in a video football game.

**TALKO TIP:** The viewpoint you choose can have a direct bearing on the success of your play execution. For example, I prefer to use the horizontal view for passing, the vertical-defense view for running plays and the vertical-offense view when on defense.

The sound department has also received a major ear lift. The new and improved Sportstalk system is an in-

dispensable part of game play. The voice is much faster and there are reportedly 500 different samples that the announcer makes use of.

In addition, the playbook has been enhanced by the inclusion of more formations with player substitutions and shotgun options.

There are adjustable difficulty levels and everything from the "zoom" view to the voices and music can be toggled on and off.

Well, how does Montana 3 play? The running game is the best in the business. It is fast, well animated and features diving, spinning and stiff-arming. It is really a blast to take off on a sweep around end or to execute an end around.

NFL Sportstalk Football '93 Starring Joe Montana is a resounding success. The bugs that were present in the '92 game have been ironed out and the game play is a step above the competition. If you are looking for an authentic NFL football simulation with graphics that are incredibly realistic and the only play-by-play announcing around, then look no further than Montana. The player has finally beaten the coach.

**N**FL Football by Konami is not yet a finished product. And, as such, is not truly reviewable and will not be part of our '93 summary. However, we could not wait to give you a big preview of what could very well end up being a superb football simulation.

Graphically, the game is going where no other has dared go before. NFL Football is using a tremendous amount of mode 7 effects with a fully rotating and scaling field that makes play execution (especially passing) much easier. The player sprites are even larger than Pro Quarterback (when fully zoomed-in) and they will jump, dive and spin as you have come to expect from the better football simulations.

NFL Football features the first play-by-play announcer in a video game outside of the Sportstalk series by Sega and some Neo-Geo titles. The voice, even at this early stage, is very clear and quick. All of this football technology comes to you courtesy of Park Place Productions, the development team that brought us the original John Madden Football for the Genesis.

We will keep you posted. In the mean time keep tuned to the one place where you know you will find the latest video sports game news, DGHF and the Talko sports report.

8 MEG  
AVAIL DEC.**

## IT'S FIRST AND TEN

## HE'S GOING DEEP!

## JUST A CHIP SHOT!

## SACKED!

Let's start this review by pointing out the weaknesses of this game because A) It won't take long, there aren't many and B) The quicker we get through the so-so stuff, the quicker we get to look at one incredible football game.

The first problem I had with this title is that it offers no password or save game feature to allow a season to be played out. This is something I was beginning to believe was becoming a standard for sports games. The second problem, actually it is more of an oddity, is that the teams only have 9 players per side instead of the standard 11 in the American game. The lack of those 2 players in no way detracts from the game. In fact, it took me 3 games before I noticed the difference. Finally, there is some flickering at times (which may be the answer to that 9 player question), but it does not effect game play at all.

Now, for the good stuff. Tradewest Pro Quarterback is to football what NCAA Basketball is to hoops. For the first time in a home football game you can see all of your receivers on screen at once instead of having them in isolated windows or represented as dots or icons. This is made possible by the first person scaling environment provided by the development team. The game is beautiful. You can scan the field to pick out the open receiver and, after releasing the ball, watch as the ball zooms down the scaling field toward your selected player, a receiver that you now control.

I have been waiting to see this in a home game since I first held a joystick in my hand. The scaling system allows Pro Quarterback to present a passing game that is incomparable.

The sprites are very large and colorful and control is excellent. Tackling is particularly fun and the act of catching the ball has been made easier by using an on-screen cursor to show the spot on the field that your receiver is running toward.

The playbook is of average size and the players do stick to their patterns. The computer puts up a tough fight in which even seasoned gridiron warriors will be hard-pressed to beat the computer. The game also has 2 player and team-mate options to add to the excitement and it keeps track of statistics for the game.

The lack of a save feature is the only thing that keeps Tradewest Pro Quarterback from being a perfect game. As it is, it is a thoroughly enjoyable football game that really makes you feel like you are part of the contest and will have you coming back for more. If you can only purchase one SNES football game this year, this is the one.

**TALKO TIP:** When trying to catch the ball thrown from the quarterback, always jump or dive as the ball is about to get to your receiver. This will increase your chances of making the catch.

## AND THE WINNERS ARE...

Without further ado, the following is my presentation ceremony to this year's members of what I humbly refer to as "The Talko Dream Team".

### GENESIS: JOHN MADDEN '93

As good as Montana NFL is, Madden gets the starting nod for its fantastic graphics, animation and game play. The inclusion of the Big Man's voice and the game's impressive artificial intelligence are its crowning glories, vaulting Madden '93 into the Talko Hall of Fame.

### SNES: (TIE) TRADEWEST PRO QUARTERBACK AND MADDEN '93

I had a really hard time making this call. Madden '93 is a major improvement over the original and a great

simulation. Tradewest Pro Quarterback is the best looking and playing football game we've had the pleasure of reviewing. So, which game do I choose? Why, both, of course.

### 1993 DHGF FOOTBALL GAME OF THE YEAR: TRADEWEST PRO QUARTERBACK

In the final judging, Pro Quarterback is my choice for football game of the year. Tradewest's title was the one that I kept coming back to and the one that drew the most oohs! and aahs! So give Santa your order now, because this title will be going, going, gone...

# Fighting Stick Review

By now everyone knows that Capcom has successfully, without a doubt, brought the arcade hit *Street Fighter II* to the home player via the SNES. Because the game had such a strong arcade following, Capcom wanted to bring not only the look, but the actual arcade feel to the home version.

Last May, Capcom announced their *Street Fighter II* Champion Joystick, who's release date would coincide with the release of *Street Fighter II* for the SNES. This announcement gave other joystick manufacturers the signal that now was the time to get into the *Street Fighter II* joystick business.

After I began to evaluate the resulting flood of joysticks for the purposes of this article I began to realize what a task I had taken on. Each of these units were of outstanding quality in one fashion or another, and were designed to be subtly unique. I found myself critiquing some of the finer points that make one joystick different from another.

## Sonic Stick

Q.D.S.

(408) 685-3141

Suggested Retail \$89.95

Width .....13"  
Depth .....10"  
Height.....6"  
Weight.....6 lbs.

The Sonic is constructed of high density board, using arcade components. When it came to executing *Street Fighter* moves, the Sonic performed identically to the arcade. The unit worked with table top play, but due to the high pitch of the face of the unit, my wrist became tired after one half hour of game play. The Sonic didn't feel really right on my lap either, so I assume it was intended to be played sitting on the floor in front of your monitor.

**Like:** Sonic used vertical arcade buttons with a tight, accurate feel.

**Dis:** The firing buttons are configured just like the *Street Fighter II* arcade. (Top row Y-X-L, Bottom row B-A-R). This is great for SF2, but for other games it puts the firing button on the top row, and jumping on the bottom. (This problem can be corrected without a degree in engineering, but a little forethought would have been less of a hassle.) No autofire option.

## Championship Joystick

KBM Mfr.

(205) 880-2008

Suggested Retail N/A

Width .....12"  
Depth .....9"  
Height .....3 1/4"  
Weight .....2 1/2 lbs.

The Championship Stick also uses SF2 arcade components, which gave me that "arcade feel". And, the Championship Joystick also executed SF2 moves just like the arcade. The Championship Joystick worked okay on a table top, but where it really shined was when it was sitting on my lap.

**Like:** As you can see from the dimensions, this stick is large, but is constructed of an ABS plastic for a light and comfortable lap top feel. I liked this well rounded stick a lot because, it played well on SF2, (SNES) and also performed really well on other SNES games.

**Dis:** No autofire option.

## Super Professional Arcade Joystick

Universal Arcade Systems  
3939 Western Street  
San Diego, CA 92110  
(619) 224-5577

Suggested Retail \$99.95

Width .....16 1/2"  
Depth .....11 1/4"  
Height .....4 1/4"  
Weight .....9 1/2 lbs.

When the people at Universal created the Super Professional Arcade Joystick, then had one and only one thing in mind, and that was to bring the SF2 arcade console into your home. It looks as though Universal yanked a control panel from a SF2 arcade machine and interfaced it with a SNES control deck. If indeed this was their goal, they achieved it. This unit can sit on your lap, but was intended to be played on a desk or table top.

**Like:** This stick is huge, in fact it's the kitchen sink! This spacious layout provides ample room on which to place your hands.

**Dis:** This complaint also encompasses the Championship and the Sonic sticks. These companies wanted to emulate the SF2 control panel as closely as possible. In each case the firing buttons are positioned very close to the joystick. (uncomfortably close.) While standing up playing SF2, this doesn't seem to be an issue. However, when sitting down, your arms (wrist) are always bending (contorted) towards the center of the joystick, instead of extended straight out in front of you. No autofire option.

## Capcom Fighter Power Stick

Capcom U.S.A.  
3303 Scott Boulevard  
Santa Clara, CA 95054  
(408) 727-0400

Suggested Retail \$70-\$75

Width .....14"  
Depth .....8"  
Height .....2 1/2"  
Weight .....2 1/2 lbs.

The Fighter Power Stick, unlike the others, doesn't use actual arcade components. It could be said, in consequence, that this stick does not actually have that "arcade feel". This may be true, but this stick really shines when it comes to playing SF2. Capcom used a micro switch joystick with a short throw, thus enabling the player to engage a Dragon Punch or a Fireball with just a slight movement of the hand.

**Like:** The Fighter Power Stick has good design written all over it. The stick performs equally well on the table or the lap, and it is constructed in such a way that both hands fit comfortable on the unit.

**Dis:** The Fighter Power Stick executed SF2 moves better than any other stick I tested. However, when it came to playing other SNES games, this one was not my stick of preference. Also, during heavy poundage, in the heat of battle, you may find yourself tapping the turbo accidentally.

Well, there you have it. As I said, when it came to playing SF2, all the units rated very high. What will differentiate between these sticks at the cash register will be very personal buying choices. What suits you needs the best ... size, weight, where does it perform best (lap, table top, etc...) and of course, the price. All right, all ready. I admit trying to walk the fence on this issue, but if you really must know, my personal favorite stick is the Championship Joystick. I liked it because it was light, and played well on my lap. I needed a stick that would work on my SF2 and other SNES games.

# OTHER STUFF

This month in other stuff let's start off by talking about the incredible U.S. debut of the Sega CD. SOA has done a fantastic job by waiting for quality software support before launching the CD in the U.S. Game Fan recently travelled to New York for the big launch/press conference to bring our valued readers the latest info on the biggest thing since the last biggest thing in gaming. (And to check out Night Trap on the Jumbotron) What we saw surpassed our expectations! Here is some of the new software due out this year and early '93... *brace yourself!*

SONY mixes the latest in digital pictures with flight simulation shooting, in one of the most impressive games I've ever seen. **SEWER SHARK** lets you fly through real video footage of specially built simulator tunnels for an experience you won't believe!, as you steer your way through, blasting mutant ratigators. It's non-stop action! You'll also interact with real life actors as the story unfolds. I didn't expect this one this early in the game!

Another SONY release that's ready to go is **HOOK**. The CD version brings digitized movie scenes and awesome computer graphics of Hook's ship to an even better version of the game with an incredible CD soundtrack!

There's some more great news from SONY. They're bringing out a CD version of **CHUCK ROCK** with five new levels!, for a total of nineteen levels and five pre-historic worlds. Add to that incredible animation sequences along with a CD soundtrack and you've got one gnarly game of Chuck Rock!

Bignet's first release for the Sega CD is **BLACK HOLE ASSAULT**. Don't even try to compare it to Heavy Nova (this one is CD all the way!), with eight player tournament and league play, ten scenarios and eight rude war machines with all new moves, and some heavy hardware. Black Hole also features broadcast quality voice and an animated storyline. Since Skid was a major fan he was panting over this one ... We had to drag him away screaming!

Virgin's got the **TERMINATOR** you've been waiting for. This new longer version features actual digitized actors incorporated in the game that you control!, plus a movie quality sound track along with 12 minutes of high quality full motion video. And that's not all, wait until you see the backgrounds... *interested?* Also on the way from Virgin (1st quarter '93) look for **OUT OF THIS WORLD** parts 1 & 2 on one CD with part 2 being a whole new adventure. Stay tuned for more news on Virgin as it develops...

Sierra on Line's **WILLY BEAMISH** is an interactive cartoon featuring sensational animation and artwork from Hanna Barbera and Disney artists along with CD quality voice and a rock & role soundtrack. In **STELLAR 7** you control the Raven Fighter Tank in a seamless ride through seven high tech battlefields. **STELLAR 7** delivers the best in arcade action and stereo sound.

In JVC's **WONDERDOG** you'll enjoy incredible graphics and sound along with the best in action platform gaming, as you journey through Bunny Hop Meadow, The Junkyard, Dogsville, Planet Weird, Foggia, Looney Moon and Planet Kninus on a mission to save your planet from the evil Pit Bully. In **WOLFCHILD** be prepared for 10 worlds of Sega CD arcade style action that will blow your mind! As a young boy you load your father's Wolfchild program and enter the transmutation booth a scared boy, and exit a lycanthropic warrior bent on revenge. In **JAGUAR XJ220** get ready for some hardware scaling right out of the arcade. Play alone or take advantage of the spectacular split screen viewing window to track progress independently of your challenger on 16 of the toughest courses in the world, from Britain to Japan, or you can use the track editor to create your very own courses from scratch. **THE SECRET OF MONKEY ISLAND** consists of a wide variety of original entertaining puzzles that become increasingly more complex and features cinematic story telling and high resolution graphics with proportional scaling in character animation.

**COBRA COMMAND** is loaded with spectacular animated full motion video combat that ignites the screen. Take command of your COBRA and blast enemy targets in a war zone... New York City. With an intense first person perspective, you'll dive through (in your face) explosions as the battle descends to street level along with full voice audio navigation commands. **NIGHT TRAP** features non-stop full motion audio and video that plays like a movie. You will be Immersed in hours of unique game play that you can create, with 104 minutes of interactive video, making each game a totally different experience! In **BATMAN RETURNS** you won't believe the scaling in the incredible 3D driving levels and Bat Ski Boat chases through the streets and canals of Gotham City at eye watering speeds around hairpin turns and breath taking jumps. You'll also hurl yourself through incredible action scenes as you battle the death dealing Penguin and the blood scratching Cat Woman. Real Penguin and Cat Woman voices taunt you every move throughout. Awesome NFL action heats up in **JOE MONTANA'S NFL FOOTBALL** which takes place on a 3D playing field with 360 degree spins, diving catches, and bone crunching tackles animated from over 600 big league moves. This game also has an incredible soundtrack, with helmet's crashing and crowds roaring that puts you in the action!

These are just some of the incredible Sega CD games coming soon. Look to Game Fan for the best CD gaming coverage from both the U.S. and Japan!

As soon as Skid scoped out the huge Jumbotron he grabbed a controller and sprung into action. As New York looked on he beat game after game and was awarded the key to the city!

While in Japan our resident fighting pro took place in the Gamest SF2 championship. Even though the buttons are set up a bit different, Gerald managed a 4th (stunning the locals) out of 400 participants, and it was steaming hot!

Is this place a zoo or what? Skid and Brody got lost on Japan's famous Harajuku street looking for a place to buy games! This street is only 5 feet wide and there are literally thousands of bargain hunters.

*Now That's An Arcade!*  
(6 floors worth)

Designed for adults, this incredible high tech arcade stays open until 12am and features the best in new games, multiple sit down SF2 units (where you sit across from your opponent!), and for a little make believe, an awesome karaoke room... Who needs clubs!!

Check out these awesome shots from the AMOA show in Japan.....  
(next page)

Control this phenomenal motocross action game by realistically maneuvering your bike up, down, right, and left. Play against a friend in attack mode, or take on eight other competitors.

## CYBER DOME

Up to six players can enjoy realistic 3D shooting action on a 300 inch screen in Sega's Cyber Dome.

In a return to earlier Atari hits like Space Duel, Space Lords is a 3D battle for 1 to 4 players, with an optional two player cooperative mode, or head to head combat. Space Lords has impressive 32 bit polygon filled graphics and realistic digitized sound. Can this be what the Jaguar will look like? Lets hope so.

Game Fan was recently invited to take a sneak peek at SNK's new 74 meg arcade hit sequel Sengoku 2. In this new version you can see your fighter from all angles and change direction in mid air. You also have more special moves and can block as you travel through time bent on destruction. Look for a full review in our next issue.

Designed totally in house by Sega, Virtual Racing uses a RISC based 32bit processor and can manipulate 180,000 polygons per second on screen. VR also features pneumatic steering feedback and in seat air chambers to simulate high G forces and crashes etc. So, if you have \$26,000 lying around check it out or find one at your local arcades.

Here's one of the only ways to get a Sonic doll in Japan. UFO Catchers are all the rage. Go figure?

Choose from four players: Goah, Gillius, Stern Blade, or Dora in this, a new 32bit Golden Axe adventure, Revenge of Death Adder. Other new features include: ten methods of attack and spectacular magic spells. There are also two paths to choose at the end of each level giving Golden Axe II lasting power previously un-available in an arcade format. Look for this one at your local arcades, coming soon.

## AND IN AMERICA...

Konami's Lethal Enforcers features incredibly realistic digitized graphics with each stage containing many different scenes and hidden surprises. You take control as a detective in the toughest section of the city battling against the most dangerous criminals.

We got so many cards and letters regarding the Chun Li photos we ran in the last issue, we thought you'd like to meet her....

Miki Mizuno is the lucky girl who was chosen out of thousands to be Chun Li for a series of personal engagements and the commercial below. Miki is 5'5" with 33-23-35 measurements and is 18 years old. Miki has eight movies (mainly action) and two commercials to her credit, and has currently released her first Single on CD. This commercial was filmed in L.A. during the riots, so if she can survive that, she must be tough enough to be Chun Li.

## Other news...

As you all know there has been talk of a **NEO GEO** CD ROM for some time now. Recently in Japan SNK put an end to the rumors by officially announcing their plans for a CD ROM upgrade. Specs will be available in April '93 and the scheduled release date is Sept. '93. Besides mega memory, the number one selling point will be considerably lower software prices. We will bring you more as it develops.

Both **Nintendo** and **Sony** of Japan have announced an agreement to manufacture and market their own CD systems. The Sony system will combine the SNES with a CD ROM drive (similar to VC's Wonder Mega). This new product will play both SNES cartridge games and CD based software. No release date was available at press time.

Nintendo's CD ROM on the other hand will be an attachment for the SNES. This system will utilize the advanced CD ROM XA format and is scheduled to be launched in the U.S. and Japan in August '93. In addition, Nintendo said they are still working with Phillips to develop a CD ROM XA "bridge format" which will make SNES CD games compatible with CD-I hardware. Sony and Nintendo CD based games will be completely compatible. Both systems house a powerful 32bit CPU allowing for texture mapped polygons, full screen full motion video, and advanced scaling & rotation without the use of mode 7.

So, it seems that CD is the wave of the future. With the introduction of these new systems plus a possible '93 release of **EA's**, **Atari's**, **NEC's**, and **Sega's** 32bit machines, it looks like we will be trading up again. The good news is that the Nintendo, Sony, **SNK**, and Sega machines will almost certainly make use of our existing software, giving us a wide variety of choices we would have never dreamed possible! See you next time in other stuff...
